WD-Activity-Based-Learning

Case Study-1

Experiment: Personal Portfolio Website Using HTML and CSS

1. Introduction

A Personal Portfolio Website is a website used to display an individual's personal details, educational qualifications, technical skills, hobbies, projects, achievements, and contact information.

HTML is used to create the structure of the website, while CSS is used to design and style the webpage. This website helps students showcase their skills, knowledge, and achievements in a professional way.

2. Explanation

This Personal Portfolio Website is designed using HTML and CSS. It contains the following sections:

1. Home: Displays the student's name, welcome message, and course details.
2. About Me: Provides personal information, career goals, and languages known.
3. Education: Displays educational qualifications such as B.Tech, Intermediate, and SSC.
4. Technical Skills: Shows skills like HTML, CSS, Python, and Artificial Intelligence using progress bars.
5. Hobbies: Displays hobbies such as reading, coding, and listening to music.
6. Projects: Shows the projects developed by the student.
7. Achievements: Displays learning achievements and technical activities.
8. Resume: Provides options to view and download the resume.
9. Contact: Displays email address and location for communication.
10. Footer: Displays copyright information and a Back to Top link.

Technologies Used:

- HTML – To create the structure of the webpage.
- CSS – To add colors, layouts, animations, and responsive design.

3. HTML Code

The following HTML code creates the basic structure of the Personal Portfolio Website.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>My Personal Portfolio</title>
    <link rel="stylesheet" href="task1.css">
</head>
<body>

    <header>
        <nav class="navbar">
            <a href="#home" class="logo">MyPortfolio</a>

            <ul class="nav-links">
                <li><a href="#home">Home</a></li>
                <li><a href="#about">About</a></li>
                <li><a href="#education">Education</a></li>
                <li><a href="#skills">Skills</a></li>
                <li><a href="#projects">Projects</a></li>
                <li><a href="#contact">Contact</a></li>
            </ul>
        </nav>
    </header>

    <section id="home" class="hero">
        <div class="hero-content">
            <p class="welcome">WELCOME TO MY PORTFOLIO</p>
            <h1>Hello, I'm <span>Saisathvika</span></h1>
            <h2>B.Tech CSE Student</h2>
            <p>
                I am passionate about programming,
                Artificial Intelligence,
                and learning new technologies.
            </p>
            <a href="#about" class="btn">
                Explore My Portfolio
            </a>
        </div>

        <div class="profile-image">

            </a>
        </div>
    </section>

    <footer>
        <p>© 2026 Saisathvika | Personal Portfolio Website</p>
        <a href="#home">Back to Top ↑</a>
    </footer>

</body>
</html>
```

4. CSS Code

CSS is used to improve the appearance of the webpage by adding background colors, fonts, spacing, card layouts, hover effects, and responsive designs.

```
/* General Styling */
* {
    margin: 0;
    padding: 0;
    box-sizing: border-box;
    scroll-behavior: smooth;
}

body {
    font-family: Arial, sans-serif;
```

```
    background-color: #f4f7fc;
    color: #333;
    line-height: 1.6;
}

/* Navigation Bar */
header {
    background-color: #172554;
    padding: 15px 8%;
}

.navbar {
    display: flex;
    justify-content: space-between;
    align-items: center;
}

.logo {
    color: white;
    font-size: 25px;
    font-weight: bold;
    text-decoration: none;
}

.nav-links {
    display: flex;
    list-style: none;
    gap: 20px;
}

.nav-links a {
    color: white;
    text-decoration: none;
    transition: 0.3s;
}

.nav-links a:hover {
    color: #38bdf8;
}

/* Home Section */
.hero {
    min-height: 450px;
    background: linear-gradient(135deg, #dbeafe, #bfdbfe);
    display: flex;
    justify-content: space-around;
    align-items: center;
    padding: 60px 8%;
}

.hero-content {
    max-width: 550px;
}

.welcome {
    color: #2563eb;
    font-weight: bold;
}

.hero h1 {
    font-size: 38px;
```

```
    margin: 10px 0;
}

.hero h1 span {
    color: #2563eb;
}

.hero h2 {
    margin-bottom: 15px;
}

.profile-image {
    width: 180px;
    height: 180px;
    border-radius: 50%;
    background-color: #2563eb;

6. Conclusion

Thus, I successfully created a Personal Portfolio Website using HTML and CSS. This website displays my personal information, educational qualifications, technical skills, hobbies, projects, achievements, resume, and contact details. Through this project, I learned how to create webpages using HTML and design attractive, responsive websites using CSS.

Case Study-2

Experiment: Student Academic Dashboard Using HTML and CSS

1. Introduction

A Student Academic Dashboard is a web-based application used to display student details, semester results, attendance percentage, subject information, and important announcements.

HTML is used to create the structure of the dashboard, while CSS is used to design the layout, colors, cards, tables, animations, and responsive features. It helps students easily view and understand their academic performance.

2. Explanation

This Student Academic Dashboard is designed using HTML and CSS. It contains the following sections:

1. Sidebar: Provides navigation links to different dashboard sections such as Overview, Results, Attendance, Subjects, and Announcements.
2. Dashboard Header: Displays the dashboard title and student profile information.
3. Student Information: Displays the student's name, roll number, department, and academic details.
4. Summary Cards: Shows important academic details such as GPA, attendance, subjects, and completed credits.
5. Semester Results: Displays subject names, marks, grades, and results in a table format.
6. Attendance: Shows attendance percentages using graphical progress bars.
7. Subjects: Displays the subjects studied by the student using cards.
8. Announcements: Displays important academic notifications and updates.
9. Footer: Displays the footer information of the dashboard.

Technologies Used:

- HTML – Used to create the structure of the dashboard.
- CSS – Used to add colors, styling, layouts, animations, and responsive design.

3. HTML Code

Create a file named index.html.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Student Academic Dashboard</title>
    <link rel="stylesheet" href="task2.css">
</head>
<body>

<div class="dashboard">

    <!-- Sidebar -->
    <aside class="sidebar">
        <h2>Student Portal</h2>
        <a href="#overview">Dashboard</a>
        <a href="#results">Semester Results</a>
        <a href="#attendance">Attendance</a>
        <a href="#subjects">Subjects</a>
        <a href="#announcements">Announcements</a>
    </aside>

    <!-- Main Content -->
    <main class="main-content">

        <header>
            <div>
                <h1>Academic Dashboard</h1>
```

```
        <p>Welcome to your student portal</p>

4. CSS Code

Create another file named task2.css.

The following CSS code is used to style the dashboard with an attractive sidebar, summary cards, tables, attendance progress bars, animations, and responsive layouts.

```
/* General Styling */
* {
    margin: 0;
    padding: 0;
    box-sizing: border-box;
    scroll-behavior: smooth;
}

body {
    font-family: Arial, sans-serif;
    background: #f1f4f9;
    color: #273248;
}

.dashboard {
    display: flex;
    min-height: 100vh;
}

/* Sidebar */
.sidebar {
    width: 240px;
    background: #172554;
    color: white;
    padding: 25px 15px;
    position: fixed;
    height: 100vh;
}

.sidebar h2 {
    font-size: 21px;
    margin-bottom: 30px;
    text-align: center;
}

.sidebar a {
    display: block;
    padding: 13px 10px;
    margin-bottom: 8px;
    color: white;
    text-decoration: none;
    border-radius: 6px;
    transition: 0.3s;
}

.sidebar a:hover {
    background: #3b82f6;
    padding-left: 18px;
}

/* Main Content */
.main-content {
    margin-left: 240px;
    padding: 30px;
```

```
    width: calc(100% - 240px);
}

header {
    display: flex;
    justify-content: space-between;
    align-items: center;
    gap: 15px;
    margin-bottom: 25px;
}

header h1 {
    color: #172554;
    font-size: 28px;
}

header p {
    color: #64748b;
}

.profile {
    background: white;
    padding: 12px 18px;
    border-radius: 8px;
    font-weight: bold;
}

/* Student Information */
.student-card {
    display: flex;

6. Conclusion

Thus, I successfully created a Student Academic Dashboard using HTML and CSS. This dashboard displays student information, academic results, attendance percentages, subject details, and important announcements. Through this project, I learned how to create tables, cards, navigation bars, progress bars, CSS animations, and responsive web layouts.

Case Study-3

Experiment 3: Online Food Ordering Website Using HTML and CSS

1. Introduction

An Online Food Ordering Website is a web application that allows customers to view food items, check prices, explore special offers, read customer reviews, and order their favourite food online.

HTML is used to create the structure of the website, while CSS is used to design the webpage with attractive colors, images, layouts, animations, and responsive features.

The main purpose of this website is to provide an easy and user-friendly food ordering experience.

2. Explanation

This Online Food Ordering Website is developed using HTML and CSS. It contains the following sections:

1. Navigation Bar: Provides links to Home, Menu, Offers, Reviews, and Contact sections. It also contains an Order Now button.

2. Hero Section: Displays a welcome message, attractive food image, and Explore Menu button.

3. Restaurant Details: Displays restaurant information such as rating, delivery time, price, and location.

4. Special Offers: Displays offers such as 50% discount, free delivery, and combo deals.

5. Food Categories: Displays different food categories such as Pizza, Burgers, Biryani, and Desserts.

6. Food Menu: Displays food images, food names, descriptions, prices, and Order Now buttons.

7. Customer Reviews: Displays customer feedback and star ratings about the restaurant.

8. Contact Section: Displays email address, phone number, and restaurant location.

9. Footer: Displays copyright information and a message for food lovers.

Technologies Used:

- HTML – Used to create the structure and content of the website.
- CSS – Used to add colors, styles, layouts, hover effects, animations, and responsive design.

3. HTML Code

File name: index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Foodie - Online Food Ordering</title>
    <link rel="stylesheet" href="task3.css">
</head>
<body>
```

```
    <!-- Navigation Bar -->
    <header>
        <nav class="navbar">
            <h2 class="logo">🍔 Foodie</h2>

            <ul class="nav-links">
                <li><a href="#home">Home</a></li>
                <li><a href="#menu">Menu</a></li>
                <li><a href="#offers">Offers</a></li>
                <li><a href="#reviews">Reviews</a></li>
                <li><a href="#contact">Contact</a></li>
            </ul>

            <a href="#menu" class="cart-btn">Order Now 🛒</a>
        </nav>
    </header>

    <!-- Hero Section -->

4. CSS Code

File name: task3.css

The following CSS code is used to design the food ordering website with attractive backgrounds, food cards, images, buttons, hover effects, animations, and responsive layouts.

```
/* General Styling */
* {
    margin: 0;
    padding: 0;
    box-sizing: border-box;
    scroll-behavior: smooth;
```

```
}

body {
    font-family: Arial, sans-serif;
    color: #292323;
    background: #fffaf5;
    line-height: 1.6;
}

/* Navigation Bar */
header {
    background: #251815;
    position: sticky;
    top: 0;
    z-index: 100;
}

.navbar {
    max-width: 1200px;
    margin: auto;
    padding: 15px 5%;
    display: flex;
    align-items: center;
    justify-content: space-between;
    gap: 20px;
}

.logo {
    color: #ffb347;
    font-size: 27px;
}

.nav-links {
    display: flex;
    list-style: none;
    gap: 22px;
    flex-wrap: wrap;
}

.nav-links a {
    color: white;
    text-decoration: none;
    transition: color 0.3s;
}

.nav-links a:hover {
    color: #ffb347;
}

.cart-btn {
    background: #ff6b35;
    color: white;
    text-decoration: none;
    padding: 9px 15px;
    border-radius: 6px;
}

/* Hero Section */
.hero {
    min-height: 480px;
    padding: 60px 8%;
```

```
    display: flex;
    align-items: center;
    justify-content: space-between;
    gap: 35px;
    background: linear-gradient(120deg, #fff0dc, #ffe1c2);
}

.hero-content {
    max-width: 520px;
    animation: slideIn 1s ease;
}

.tagline {
    color: #e85d04;
    font-weight: bold;
    letter-spacing: 2px;
}

.hero h1 {
    font-size: clamp(34px, 5vw, 55px);
    line-height: 1.2;
    margin: 15px 0;
    color: #382019;
}

.hero-content p {
    margin-bottom: 12px;
}

.hero-image img {
    width: 100%;
    max-width: 440px;
    height: 320px;
    object-fit: cover;
    border-radius: 50% 20% 50% 20%;
    box-shadow: 0 10px 25px #5b291d30;
}

/* Buttons */
.btn {
    display: inline-block;
    background: #ff6b35;
    color: white;

6. Conclusion

Thus, I successfully designed an Online Food Ordering Website using HTML and CSS. This website displays restaurant details, food categories, menu items, prices, special offers, customer reviews, and contact information. Through this project, I learned how to create attractive food cards, navigation bars, image layouts, hover effects, CSS animations, and responsive web pages.
